Pedro Tozaki

Full-Stack Software Engineer | C#/.NET Core · React/Next.js ·
TypeScript · PostgreSQL | REST APIs & Clean Architecture |
Shipping products with AI-assisted workflows
Indaiatuba, São Paulo, Brazil

Summary

I'm a full-stack software engineer who builds and ships production web applications end-to-end — from RESTful APIs and data layers to responsive frontends. I work primarily with C#/.NET Core on the backend and React/Next.js with TypeScript on the frontend, following Clean Architecture and clean-code principles. At ACSN, I helped migrate 10+ legacy modules of ERP systems used by 6,000+ business clients to modern web platforms, and contributed end-to-end to a brand-new system. I optimized critical database queries by introducing Dapper alongside EF Core — making heavy queries 3x faster — and delivered unit-tested business logic and responsive Angular/React interfaces. I was promoted from intern to Junior Developer within one year. What sets my work apart is an AI-assisted development workflow: I orchestrate specialized AI agents across the full lifecycle — requirements, documentation, planning, architecture, implementation, and automated QA — always under human review. With it, my team delivered features and sprints up to 5x faster than manual development, to the point of proactively planning and shipping new iterations ahead of demand. I'm open to international, remote opportunities where I can keep growing as an engineer and contribute to product-focused, agile teams. Full professional English (TOEIC certified).

Experience

ACSN Desenvolvimento de Software do Brasil

1 year 6 months

Junior Software Developer

December 2025 - Present (7 months)

Salto, SP

- Migrated 10+ legacy ERP modules (used by 6,000+ business clients) to modern web platforms, preserving full functional fidelity.

- Built RESTful APIs in C#/ASP.NET Core under Clean Architecture, with clean-code patterns and unit tests for complex, maintainable business logic.
- Optimized critical database access by introducing Dapper alongside EF Core, making heavy queries 3x faster.
- Developed responsive Angular and React interfaces with custom components that standardized the product's user experience.
- Drove an AI-assisted development workflow (specialized agents for requirements, docs, architecture, implementation and QA, under human review), delivering features and sprints up to 5x faster than manual development.

Software Development Intern

January 2025 - December 2025 (1 year)

Salto, SP

- Developed corporate web systems for retail and industrial clients, focused on backend with C#/ASP.NET Core under Clean Architecture and clean-code principles.
- Built REST APIs integrated with the database and wrote unit tests to ensure reliability and quality.
- Expanded into frontend with Angular and TypeScript, taking part in the full development cycle of UI features and improvements.
- Growth and consistent delivery led to promotion to Junior Software Developer within one year.

PaP Solutions

6 years 5 months

IT Manager

January 2021 - October 2024 (3 years 10 months)

São Paulo, SP

- Managed IT infrastructure and technical support; automated internal processes and built integrated data tools that improved team productivity and unified strategic information.
- Led prospecting platforms and cold-mailing campaigns with precise lead segmentation.

Lead Generation & Enrichment Analyst

January 2019 - January 2021 (2 years 1 month)

- Researched and qualified lead lists using SalesNavigator and Snovio; enriched and managed CRM data, using Excel for data cleaning and organization.

Corporate Prospecting Executive
June 2018 - January 2019 (8 months)

- B2B prospecting: identified decision-makers, ran outreach campaigns, and booked qualified meetings, contributing to the sales pipeline.

Bureau Veritas Group
Administrative Assistant
January 2017 - January 2018 (1 year 1 month)
São Paulo, SP

- Administrative support for a vehicle inspection platform: scheduling, document control, and partner communication, ensuring efficient internal workflows.
